

Modern Construction's Health and Safety Policy

We are committed to providing and maintaining a safe and healthy working environment for our employees, visitors, and all people using our premises as a workplace.

To ensure a safe and healthy work environment, we will develop and maintain a health and safety management system. Specifically, Officers and Senior Management will:

- Set health and safety objectives and performance criteria for all managers and work areas
- Annually review health and safety objectives and managers' performance against these
- Actively encourage the accurate and timely reporting and recording of all incidents and injuries
- Investigate all reported incidents and injuries to ensure all contributing factors are identified and, where appropriate, plans are developed to take corrective action
- Actively encourage people to report any pain or discomfort early on
- Provide a treatment and rehabilitation plan that ensures a safe, early and durable return to work
- Identify all existing and new hazards and take steps to assess and manage the risk associated with these hazards.
- Ensure all employees are aware of the hazards in their work area and are adequately trained to enable them to perform their duties in a safe manner
- Encourage worker consultation and participation in all matters relating to health and safety
- Promote a system of continuous improvement – this includes reviewing policies and procedures each year
- Meet our obligations under the Health and Safety at Work Act 2015, the Health and Safety at work regulations 2016, codes of practice, and any relevant standards or guidelines.

Every manager, supervisor or foreperson has a responsibility for the health and safety of employees working under their direction.

Every worker is expected to share in this commitment to health and safety in the workplace by:

- Observing all safe work procedures, rules and instructions
- Reporting any pain or discomfort early on
- Taking an active role in the company's treatment and rehabilitation plan, to ensure an "early and durable return to work"
- Ensuring all incidents, injuries and hazards are reported to the appropriate person.

Our health and safety committee includes senior management representatives and other nominated worker representatives. They are responsible for implementing, monitoring, reviewing and planning health and safety policies, systems and practices.
